## Abstracts

Enterprise Resource Planning (ERP) is referred to business process management software that enables enterprises to use integrated application systems to manage business and automate certain product, technology and human resources related back office functions. ERP software combines all aspects of an organization into a single database, application, and user interface, including product development, manufacturing, product planning, sales, and marketing. It also provides a degree of structured monitoring and automation. Instead of requiring employees to keep different databases and spreadsheets that need to be combined manually to produce documents, ERP systems allow employees to extract reports from one process. Based on the ERP Solutions market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
