## Abstracts

Ethylenediamine (EDA) is a robust base and chelating agent, which is characterized by its clear liquid-like colorlessness and ammonia-like odor. Though there are several precautions that must be taken during the handling of ethylenediamine, as it can be severely hazardous to health and can even cause blindness as a result of high exposure, it is highly useful too for a number of industries such as paints and coatings, agrochemicals, pharmaceuticals, mining and textile, and fuel and energy. Based on the Ethylenediamine(EDA) market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail.
