Abstracts

Explosives and narcotics trace detectors refer to the equipment which allow the discovery of a small magnitude of narcotics and explosives. The detection is accomplished by sampling invisible trace amounts of particulates. This equipment is used in vulnerable areas considered susceptible to unlawful interference such as cargo facilities, access control points of critical infrastructure, and airports. The ETD technology is used to detain people handling narcotics and explosives and to identify traffickers of illicit material. Moreover, it restricts narcotics trafficking, thereby increasing homeland security.
