## Abstracts

Fermented foods belong to a category of foods called functional foods that are known to have a positive effect on health. Probiotics are the bacteria used to ferment traditional foods. Thus, fermented foods and probiotics are closely related and co-exist due to the health attributes associated with their intake. However, the efficacy of probiotics is enhanced when taken in the form of fermented food rather than as probiotics alone. The gaining popularity of probiotics leads a growth of functional food and beverage market which in-turn is driving the fermented food and drinks market.

Based on the Fermented Food and Drinks market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
