Abstracts

Flexible firestop sealant is specific type of sealants that help avert the spread of fire. They prevent the fire from spreading by sealing openings to fire-rated interiors of a building construction, floors, ceilings or wall assembly. They are possessing fire resistant properties with exceptional longevity, as well as greatly reducing the formulation of smoke and other harmful toxins. They could also additionally act as an acoustic barrier by reducing the transfer of noise. Flexible firestop sealant is paintable, and can also be easily cleaned with water.
