Abstracts

Food is any substance consumed to provide nutritional support to an organism [1]. It usually comes from plants or animals and contains essential nutrients such as carbohydrates, fats, proteins, vitamins or minerals. The substance is taken up by the organism and absorbed by the cells of the organism to provide energy, sustain life or stimulate growth.

Based on the Food market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
