## Abstracts

Food refers to a substance that can meet the normal physiological and biochemical energy requirements of the body and can continue its normal life. For the human body, substances that meet the needs of people's normal living activities and prolong their life are called foods. All goods that are not eaten are 'non-food.' Non-food products include knitting, clothing, bags, home appliances, toys, etc. Non-food items have no shelf life. Based on the Food and Non Food Retail market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
