Abstracts

Frozen yoghurt is made from yoghurt, yoghurt cultures, sweeteners, colourings and flavourings. It is made in the same way as ice cream, constantly churned while it is being cooled so that it prevents large ice crystals from forming. However it is made with yoghurt rather than cream. Frozen yoghurt is served in a wide variety of flavours and styles and many companies allow customers the option of adding various toppings. Fat-free and sugar-free varieties are also available.

Based on the Frozen Yogurt market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
