## Abstracts

Functional fitness equipment allows you to exercise in free form, allowing your body to move freely in all aspects.

Bars and plates are widely used by enthusiasts, and they are addicted to dynamic lifts, including snatching and cleaning, especially for heavy weights and high repetition rates. While most athletes prefer standard sized rods, some have smaller diameters. Smaller diameter rods are especially suitable for female fitness enthusiasts, and their participation rate has increased significantly recently.

Rowing machines have recently witnessed the popularity of combined machines that combine cardiovascular elements with anti-muscle construction. The easy integration of the rowing machine and the low impact properties have attracted the interest of older fitness enthusiasts.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Functional Fitness Equipment market covering all its essential aspects.
