Abstracts

G3-PLC was developed to meet the industry's need for a potentially ubiquitous powerline communications standard that will enable the smart grid vision. G3-PLC communicates across existing power lines without the need for additional wire or fibers. Offering higher data rates, further reach, and better error correction than previous narrowband power-line communications (NB-PLC) standards, this open, IPv6-based standard will accelerate widespread development of internet-based energy management systems.

Based on the G3-PLC Module market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
