Heavy Fuel Oil is also known as residual fuel oil, which is a by-product in the refining process of crude oil. Heavy Fuel Oil contains residuals of distillation and subsequent cracking of crude oil, which make it available at lower costs. Heavy Fuel Oil has many layering and therefore, it should be used, maintained and stored in a high temperature. Heavy Fuel Oil generators cost less as compared to other generators, because of the availability and low cost of heavy fuel oil used in it. They are majorly used in marine engines, because of its small size. Other than marine engines, they are used in powered boilers and railroads.
