Abstracts

Golf players usually transport golf clubs in golf bags. Modern golf bags are made of nylon, canvas and/or leather with plastic or metal reinforcement and frames. Golf bags have several pockets for carrying all kinds of equipment and supplies needed on a round of golf course. In fact, all bags are cut with rigid support at the top opening, both for rigidity and for separating various types of clubs for easy selection. The more expensive bags have sleeves or pockets for each individual club in the main compartment, allowing easier removal of the required clubs from the bag and return without interference from the grips of other clubs or the internal hardware of the bag. Based on the Golf Bags market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
