Abstracts

Green marketing includes marketing products and services based on environmental factors or awareness. Companies involved in green marketing make decisions related to the entire process of the company's products, such as processing, packaging and distribution methods. These practices may be part of a broader set of environmental, social and governance (ESG) standards, which are a range of socially responsible measures companies can take.

Based on the Green Marketing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
