Green packaging can also be called pollution-free packaging and environmental friend packaging, which means that it is harmless to the ecological environment and human health, can be reused and regenerated, and is in line with sustainable packaging. Its philosophy has two aspects: one is to protect the environment, and the other is to save resources. The two complement each other and are inseparable. The protection of the environment is the core, and resource conservation is closely related to the protection of the environment, because saving resources can reduce waste, in fact, it is the protection of the environment from the source.
