Abstracts

Helpdesk outsourcing refers to the process of engaging an external resource or service provider to provide technical support to employees and manage the same. It has gained in popularity over the past few years as firms are seeking to minimize in-house expenses. Apart from the inherent cost advantages, it can aid in enhancing the productivity within a short time because of a well-trained and continuously monitored workforce. Scalability in terms of handling of calls can also be ensured. These services are also providing a competitive edge to the SMBs that do not have the resources to build and maintain a technical help desk.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Help Desk Outsourcing market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation.
