Abstracts

High-performance computing as a service (HPCaaS) is the provision of high-level processing capacity to customers through the cloud. HPCaaS provides the resources required to process complex calculations, working with massive amounts of data through existing platforms. The model makes compute-intensive processing possible for those without the investment capital required for the skilled staff, hardware and development of a high-performance computing platform. The same workloads for scientific computing and big data analysis that are run on local high-performance computing (HPC) systems can be run on HPCaaS.

The High-Performance Computing as a Service (HPCaaS) market revenue was xx Million USD in 2016, grew to xx Million USD in 2020, and will reach xx Million USD in 2026, with a CAGR of xx during 2020-2026.
