## Abstracts

The main use of natural coal is to provide the right amount of heat for the hookah for a long time. They are usually from coconut shells and are very environmentally friendly. Natural coal is more durable than their fast coal and is easier to smoke. They are usually cubic in shape and require a highly consistent heat source for smoking. Fast light charcoal consists of several different foundations that can ignite coal easily and quickly. They are usually coated with sulfur to help the charcoal heat up quickly. Based on the Hookah Charcoal market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
