## **Abstracts**

HR software naturally saves labor time for managers and HR staff through automation, but it also assists with HR processes that allow for better planning, budget management, and decision making. HR software makes it possible to see, for example, how many employees are needed at certain times of year based on historical data so that recruitment resources can be allocated and mobilized accordingly. There are a myriad of other ways that a company may benefit from relying on software rather than faulty and disorganized paper records.
