Abstracts

Hydraulic Workover functions are performed with the help of Hydraulic Workover Units. These units can quickly perform various workover operations such as repairing of well casings and casing levels, sand cleanout from the well, change out completions, well deepening, tailpipe and liners installations, plug milling, cementing, and repairing of downhole safety valves. Hydraulic Workover Units are very cost-effective and efficient machines considering the cost involved in the exploration and production activities. The units are designed to work in both offshore and onshore sites.
