Abstracts

Hydroponics is a new type of hydroponic flower cultivated using soilless cultivation techniques and cultivated with nutrient solution. The core is that the nutrient solution replaces the soil to provide water, fertilizer, gas, heat and other growth factors to the flower plant, to meet the conditions required for the growth of the flower plant, and to ensure that the plant completes the entire life cycle. The nutrient solution is a concentrate with a height of 1:50 and must be diluted before use.
