Abstracts

Icewine is a type of liqueur that has been frozen from the production of grapes while still in the vines. The sugar and other dissolved solids are not frozen, but the water does allow for a more concentrated grape juice development. The grapes must be pressed from the frozen grapes, resulting in a more concentrated, very sweet wine.

Based on the Icewine market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
