Abstracts

Identity as a Service is an as-a-service, cloud-based subscription model for identity and access management (IAM). This means that identity and access services are rendered over the Internet by a third-party provider rather than deployed on-premises. IDaaS can contain a range of services, but typically includes single sign-on (SSO), multi-factor authentication (MFA) and directory services that provide organizations with simple and cost-effective identity and access management (IAM) capabilities.
Based on the Identity and Access Management market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
