Abstracts

A vacuum truck is a tank truck that has a pump and a tank. The pump is designed to pneumatically suck liquids, sludges, slurries, or the like from a location (often underground) into the tank of the truck. Is to enable transport of the liquid material via road to another location. Vacuum trucks transport the collected material to a treatment or disposal site, for example a sewage treatment plant. Vacuum trucks can be equipped with a high-pressure pump if they are used to clean out sewers from sand.
