## Abstracts

Telematics (also known as black box insurance) is car insurance, in which a small box is installed in the car. The black box measures all aspects of the driver's driving style, time and location. This data can be used to calculate personalized renewal quotes or for services such as accident alerts and theft recovery.

Based on the Insurance Telematics market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
