Abstracts

Interpretation providers offer onsite, video, and phone-based interpretation solutions. Interpretation is a live service, differing from translation solutions, which are typically carried out after an event has concluded. Because it is conducted live, interpretation is usually considered less accurate than translation, which allows for more time to consider definitions and nuances of the original language. Providers interpret numerous languages, including many sign languages, and are often available around the clock. Generally, both consecutive (when the speaker and interpreter take turns speaking) and simultaneous (when the interpreter simultaneously interprets the speaker) interpreting services are available. Some providers employ interpreters with a wide range of industry-specific knowledge that can be used across many fields. Interpretation providers frequently offer confidential and in some cases HIPAA-compliant services. Businesses that work internationally or with clients that speak different languages may benefit from interpretation services. Businesses that frequently require interpretation may hire in-house interpreters but still utilize these providers when interpretation of lesser-known languages is needed. During interpretation sessions, clients may enlist transcription services to document the conversations for their records.

Based on the Interpreting market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
