Abstracts

Isolated Barriers are one kind of isolators which are used in hazardous area and does the same function like a zener barrier. There are many advantages for using Isolated barriers: No IS earth is required for Isolated barriers; For isolated barriers overall load resistance calculation is very easy and normally can drive higher load resistance than zener barrier; Isolated barriers are 4-wire device, but again this doesn't make any difference since the device will be installed in the panel and separate power supply is not a problem.
