## Abstracts

A jar opener is a kitchen device which is used to open glass jars. Many people can remove the lids of glass jars by hand. Some people cannot and others prefer to use a jar opener.

A traditional jar opener will have two handles, leading up to two concentric grooved rings which can be used to fit different jars. It also sometimes has a device to open a bottle on it.

Based on the Jar Opener market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
