Abstracts

Kitchen sinks are primarily utilized in residential and commercial kitchens. Most residential kitchen sinks either have a single or double bowl. Also, though most kitchen sinks are surface mounted and installed into a countertop, solid surface countertops can have sinks mounted from underneath. Kitchen sinks are usually installed in a standard width cabinet which is known as sink base. The piping which serves the kitchen sinks is fairly typical for most sinks. Piping can be done during the rough-in phase of construction before the sink is selected. Most kitchen sinks have a garbage disposal unit. Size of the drain opening is standard for all kitchen sinks. Kitchen sinks are available in a variety of materials such as stainless steel, solid ceramics, composite, etc. Stainless steel is the most competitively priced material.
