## Abstracts

Sheep are the only source of lanolin oil. A sheep gets sheared once yearly and provides about 10 pounds of wool annually. Lanolin is an amber-colored fatty substance taken from the sheep's wool before it is washed. Lanolin is made up of wax esters, fatty acids and other organic compounds. It is solid at room temperature and melts at 100 to 107 degree Fahrenheit. Lanolin oil derives from lanolin but is a liquid at room and body temperature. Lanolin oil softens the skin and is a good humectan. Lanolin Wax is High melting wax fraction separated from lanolin USP. Widely used in industrial applications for its emulsifying power, uniform consistency and ability to inhibit crystallization of other waxes. When combined with ethylene and propylene oxides in various ratios, lanolin wax provides increased water solubility and performs as non-ionic surfactant.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Lanolin Oil and Lanolin Wax market covering all its essential aspects.
