## Abstracts

Toner is a powder mixture used in laser printers and copiers that typically form printed text and images on paper through a toner cartridge. Most of the granular plastics, the early mixture only added carbon powder and iron oxide, but later developed a mixture containing polypropylene, fumed silica and various minerals for triboelectric charging. Toners using plant-derived plastics also exist as a substitute for petroleum plastics. The toner particles are melted by the heat of the fuser to adhere to the paper.

Laser toner cartridges for color copiers and printers are available in cyan, magenta, yellow, and black (CMYK), which can be mixed to produce a very large color gamut.
