Abstracts

Lithium-ion (Li-ion) polymer batteries are rechargeable batteries that are increasingly used in portable and mobile devices. These high-efficiency battery technologies integrate more energy into smaller sizes than almost any other battery type. The Li-Ion Battery Protection IC is a preventive device designed to provide accurate monitoring and trigger thresholds for overcurrent protection in high discharge current operation or battery overcharge conditions. These batteries are integrated with power MOSFETs to prevent large external short-circuit currents and protect circuits from excessive discharge currents.
