## Abstracts

A Line-Array Loudspeaker system is the most preferred choice for installation and large touring production. It consists of multiple identical or similar loudspeakers that are arranged in a vertically or horizontally connected configuration and works together to cover the frequency range. Line array speaker systems keep consistent sound levels from the front to the back of the listening areas. Also, a well-placed line array speaker system prevents sound leaking onto stages resulting in decreased level of sound regeneration through open microphones on the stage.
