Abstracts

Liquid Eyeliner is a cosmetic used to define the eyes. It is applied around the contours of the eye to produce a variety of aesthetic effects. The eyeliner consists of three main components: a film former, a pigment and a thickener. The film former deposits a thin layer on the skin to aid the makeup stick. A liquid eyeliner is an opaque liquid that is usually contained in a small bottle and is usually applied with a small, sharp brush. It creates a clean, precise line. Because the liquid eyeliner has a heavier appearance, it is usually only applied to the upper eyeliner.

Eyeliner pens are in the form of pencils, liquids, gels and creams. A pigment is a component that imparts color to the eyeliner. Common colors are brown, black and blue, but there are other colors to choose from. Thickeners are usually made of wax or clay. These added substances to the eyeliner to adhere to the skin. Depending on the brand, some eyeliners also contain other ingredients, and some even contain metal sheets for a more radiant effect. The traditional wax-based eyeliner is made up of about 20 components. Approximately 50% by weight is wax (eg Japanese wax, fat or related soft material, which slips easily onto the skin. Most cosmetic eyeliners contain octadecyl heptanoate. Typical pigments include black oxidation Iron, as well as a small amount of titanium carbon dioxide and Prussian blue.

A liquid eyeliner is an opaque liquid that is usually contained in a small bottle and is usually applied with a small, sharp brush. It creates a clean, precise line. Because the liquid eyeliner has a heavier appearance, it is usually only applied to the upper eyeliner. Based on the Liquid Eyeliner market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure

analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
