Abstracts

Lug Caps is a type of Vacuum Seals that are designed to seal tightly when there is vacuum in the space between the top of the package during the process of sterilization or unsealed because the vacuum is necessary for product preservation.

Lid will be embossed with spiral or wavy or curved out in horizontal or vertical in series by having the protrusion of a bottle cap or screw locked with embossed bottleneck.

When sealed, the lid screw will be rotated onto the container which is well compatible with the bottle screw, resulting in a tight seal. Made of sheet steel. It is used to seal a glass bottle food container such as fruit, jam, ketchup and etc. Lug Caps can be opened when it is twisted only 90 degrees.

Based on the Lug Caps market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
