MALE means medium-altitude long-endurance. Unmanned aerial system (UAV) flight training and simulation can be defined as a simulation of the operation of a real-world system or process related with UAV flight training. These systems simplify pilots to train in an artificial environment that prepare them to obtain skillsets required to gain hands-on experience for real-time situations without the risks associated with actual flights. Beside the MALE UAV, there also should be HALE and LALE UVA.
