## Abstracts

MALE means medium-altitude long-endurance. Unmanned aerial system (UAV) flight training and simulation can be defined as a simulation of the operation of a real-world system or process related with UAV flight training. These systems simplify pilots to train in an artificial environment that prepare them to obtain skillsets required to gain hands-on experience for real-time situations without the risks associated with actual flights. Beside the MALE UAV, there also should be HALE and LALE UVA.

Based on the MALE UAV Flight Training and Simulation market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
