## Abstracts

Medical Second Opinion refers to a patient's act of requesting or seeking evaluation of his health condition by another physician or specialist to verify and confirm the diagnosis and treatment prescribed by the previous physician or to know an alternative treatment plan. It is primarily sought after when the first physician recommends a complex/painful surgery or painful and risky procedures. The other situations that propel the patient to seek a medical second opinion are when the patients is not sure of the diagnosis or is unsatisfied with the treatment plans offered by the primary physician or when it is required by the insurance plan or when the physician himself recommends to go for it.

Based on the Medical Second Opinion market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
