Abstracts

Medium voltage inverters have different topologies. The difference is how to combine the required rated voltage with a power module with a small rated voltage. The rated voltage of the inverter will be greater than or equal to one of the following standard motor rated voltages: 2.3/4.16 kV (60 Hz) or 3.3/6.6 kV (50 Hz). Some applications use a low-voltage inverter to drive a medium-voltage motor through a step-up transformer.

Based on the Medium-Voltage Inverter market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail.
