## Abstracts

Micro-hospitals are small scale inpatient facilities with eight to 15 beds and in an area of 15,000 to 60,000 square feet on an average. Micro-hospitals operate in metropolitan area, within range of 20–25 miles of large scale hospitals. They have large operation area and scale of operation as compared to ambulatory centers and emergency care centers. Micro-hospital offers various services such as emergency services, pathology lab services, pharmacy, and imaging services. Some of these also provide primary care and dietary services or surgical services.

Based on the Micro-Hospitals market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
