Microgrid-as-a-Service (MaaS) is a new, industry-leading financing mechanism that enables organizations to deploy microgrids without any upfront investment. This financing model allows municipal, district, institutional, commercial campuses and large buildings to stabilize long-term energy costs and upgrade critical energy infrastructure without capital outlay. In many higher cost areas, microgrids with distributed solar or cogeneration mean that microgrid power can be less costly than utility power. In other cases, the delta is spent on electrical or resilience upgrades.
