Abstracts

Mining equipment is used to extract natural resources such as coal, metals, and minerals. Some of the minerals and metals extracted include iron ore, bauxite, titanium, copper, gold, platinum, sand, gravel, salt, and other non-metallic products. Mining equipment rental is a type of rental activity in which the lessee chooses the equipment he chooses from the manufacturer or vendor, and enters into a longer-term rental with the lessor. The high cost of capital, maintenance cost, and overhead cost attached with the ownership of mining equipment have compelled end-users to rent mining equipment instead.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Mining Equipment Rental market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation.
