Data Collector allows you to go beyond forms and build robust business applications and end-to-end mobile data workflows. Mobile Data Collection (MDC) is the use of mobile phones, tablets or PDAs for programming or data collection. MDC can be very useful to the evaluator who is collecting quantitative data for their evaluation or abstracting data for an evaluation.

There are many mobile phone applications (referred to as platforms) which will allow you to build a mobile data collection survey. These platforms will allow you to customise the survey to collect specific data as required, such as photographs, information from a list selection, voice recordings, GPS coordinates, etc. Platforms vary in ease of use, cost, and features.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Mobile Data Collectors market covering all its essential aspects.
