Mobile Power Plant refers to a mobile power source equipped with a full set of power supply equipment on a transport vehicle such as a trailer. Mainly for the power of engineering operations or lighting power supply. The series of mobile power plant has a variety of structures and functions, such as automotive power stations, trailer power stations, mobile low-noise power stations, and mobile container power stations. The mobile power plant is required to work reliably, with stable performance and strong adaptability to the natural environment. At the same time, it must be as small, light, and flexible as possible. The structural layout of the power plant is compact and reasonable, and it is easy to use, repair and maintain. Each component should use standard or mass-produced products, which is convenient for general use and interchangeability. Its wearing parts should be accompanied by spare parts.
