Abstracts

Mobile Ticketing is the process by which consumer can book tickets for any transportation or any event or entertainment show via mobile devices without using any paper at all. Mobile ticketing is preferred over the paper based ticketing as mobile ticketing reduces production, distribution costs and increases the customer convenience. Mobile ticketing enables simple purchasing of tickets.

Based on the Mobile Ticketing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
