Abstracts

A monoclonal antibody, abbreviated as a monoclonal antibody, is an antibody produced by only one type of immune cell, relative to a polyclonal antibody. A monoclonal antibody is produced by a cell in which an immune cell capable of producing such an antibody is fused with a cancer cell, and the fused cell has both the ability of the tumor cell to continuously divide and the ability of the immune cell to produce an antibody. The fused hybrid cells can produce a large number of identical antibodies.
