Abstracts

A mortgage loan or, simply, mortgage is used either by purchasers of real property to raise funds to buy real estate, or alternatively by existing property owners to raise funds for any purpose, while putting a lien on the property being mortgaged. The loan is 'secured' on the borrower's property through a process known as mortgage origination. This means that a legal mechanism is put into place which allows the lender to take possession and sell the secured property ('foreclosure' or 'repossession') to pay off the loan in the event the borrower defaults on the loan or otherwise fails to abide .
