Abstracts

Narrowband IoT (NB-IoT) is a new wireless technology that was standardized by 3GPP in 2016. It is fast emerging as the best in class LPWA technology to enable a wide range of new IoT devices including smart parking, utilities, wearables, and industrial solutions. This is due to its ability to efficiently connect large fleets of devices, up to 50,000 per NB-IoT network cell, while minimizing power consumption and increasing coverage range in locations not served by conventional cellular technologies.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Narrowband IoT (NB-IoT) market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation. Further, mergers & acquisitions, emerging market trends, the impact of COVID-19, and regional conflicts will all be considered.
