Abstracts

Natural Stone Coating (Polymer Modified Cement) is a very strong and durable thin decorative layer that is applied over concrete. Polymer Modified Cement is not a new product; it has been around for decades. However, applying it in a decorative fashion over existing concrete is somewhat new. Just like the relatively new faux finishes that have become popular for the inside of the house, the paint itself has been around for decades. Just the way it is applied is new.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Natural Stone Coating market covering all its essential aspects.
