## Abstracts

Natural Stone Coating (Polymer Modified Cement) is a very strong and durable thin decorative layer that is applied over concrete. Polymer Modified Cement is not a new product; it has been around for decades. However, applying it in a decorative fashion over existing concrete is somewhat new. Just like the relatively new faux finishes that have become popular for the inside of the house, the paint itself has been around for decades. Just the way it is applied is new.

Based on the Natural Stone Coating market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
