Abstracts

Nuclear Cables have many types and quantities. If divided by purpose, there are five categories: power cables, control cables, measurement cables, communication cables, and fire-resistant cables (silicon insulated cables). Compared with general industrial cable, the biggest difference is that the performance requirements of nuclear power plant cable material need to be low smoke and halogen-free flame retardant. Insulating and sheathing materials for nuclear grade cables must use low smoke, non-toxic, non-corrosive, halogen-free flame retardant cable materials, such as thermoplastic flame retardant halogen-free and cross-linking flame retardant halogen-free materials.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Nuclear Cable market covering all its essential aspects.
